Guardian Glass introduces Guardian SunGuard® SNX 60 and SNX 60 Ultra

- ***Triple silver high performance glass offers enhanced aesthetics.***
- ***Consistently neutral transparent appearance.***

Bertrange, Luxembourg, April 3, 2017 – Guardian Glass is introducing a new addition to its eXtra Selective family of solar control glass: Guardian SunGuard® SNX 60. SNX 60 is ideal for commercial facade applications that require high performance, energy efficiency and improved aesthetics.

New SunGuard® SNX 60 offers a highly desirable and consistently neutral transparent appearance. It was developed to provide optimal aesthetics and technical performance on both Guardian ExtraClear® float glass – available as SunGuard® SNX 60 – and on Guardian UltraClear™ low-iron float glass – available as SunGuard® SNX 60 Ultra.

According to Nicolas Gouzou, Product Manager at Guardian Glass: “The introduction of SunGuard® SNX 60 marks the first of a new generation of triple-silver products characterised by enhanced aesthetics and color, regardless of the angle of vision. We foresee the launch of further products for this range in the near future.”

SunGuard® SNX 60 is a triple-silver coated, solar control glass that lets in 60% of natural daylight and just 29% of the solar heat – one of the highest selectivity (ratio of light transmission to solar factor) products available in the industry today. It may help lower a building’s energy costs by reducing the need for artificial lighting and air conditioning, whilst adding a sophisticated touch to the design of the glazed façade. Moreover, with a U-value of 1.0 W/m²K, it provides a very high level of thermal insulation, which may help to reduce heating costs during the colder periods.

New SunGuard® SNX 60 is available in both annealed and heat treatable versions. It can also be supplied on laminated glass for safety, security or acoustic applications.

Guardian Glass is a major business unit of Guardian Industries Corp. For more information, please visit www.guardianglass.com.

About Guardian Industries Corp.:

Based in Auburn Hills, Michigan, Guardian Industries is a diversified, global company with a vision to create value for customers and society through constant innovation using fewer resources. Guardian, its subsidiaries and affiliates employ 17,000 people and operate facilities throughout North America, Europe, South America, Africa, the Middle East and Asia. Guardian Glass is a leading international manufacturer of float, value-added coated, and fabricated glass products and solutions for architectural, residential, interior, transportation and technical glass applications. SRG Global is one of the world's largest manufacturers of advanced, high value coatings on plastics for the automotive and commercial truck industries, providing solutions for greater surface durability, structural integrity, functionality, vehicle efficiency and design flexibility. Guardian Building Products is a leading U.S. based distributor of specialty building products. For more information, visit www.guardian.com.

* Performance values mentioned are for a standard double glazed unit.
